About This Game

You open your eyes, slowly and painfully, as a dull throb pounds inside your skull. All around you is darkness accompanied by an overwhelming silence. There is a weight in your lap as you squint into the darkness revealing nothing but what seems to be the hospital bed you are lying in and the cold, metallic glint of a flashlight's metal casing.

You reach down anxiously, taking the flashlight in hand and trying to take comfort in its ambient glow. Your surroundings reveal nothing. A room. Cold. Dark. Lonely.

"Caution: This bunker has been evacuated. All occupants are instructed to make their way to their nearest assigned exit and to follow the instructions of security. Caution..."

It repeats its soulless instruction and the sickly feeling of dread coils in your stomach as you take your first steps forward. Your thoughts struggle to make sense in your head but instinct tells you that things are about to get worse...

Finding your way out of the bunker will not be as easy as you think; defended by numerous security systems, your journey is going to be a dangerous one. Sure, you could try to activate the shutdown sequences... As long as you can solve the puzzles required to do so.

You are alone. Defenseless. Confused. But then, for you, it was always this way...

Creepy but fun! This game is so original: an arcade-style exorcist simulator. I will be replaying this many times!
<https://www.youtube.com/watch?v=4g9BAHDCzyA>. i think i bought it when it was brand new and in its first alpha stage and it was a little clunky but still a lot of fun and really great. Over time they added features and made the menus smoother and other things. However, in the last year or so the game has gone totally upside down in quality. the guns aim and sound like the developers were described how to shoot and what guns sound like by someone in another room. bullet impacts are now little flashes of light on the ground, on the trees and rocks, and they sound like someone hitting a drum under a pillow. you make your character and the game now starts with you near a village with AI armies around, but their map characters have their arms raised in the air, their legs and heads are backwards, and the marching animation is not at all fluid or nice looking. the city menu options sometimes overlap other buttons and you cant hit the x to leave, its not a huge thing because you can use your escape key, but still, i expect better since they started with a great game and concept for whatever reason decided to progressively making it worse and worse.. I have to recommend this one, because otherwise you might never hear about it. If you like both adventure games and puzzle games with ♥♥♥♥♥♥♥♥/amazing writing, this may be the game for you. The ending is pretty rough, but all the way until then I really enjoyed this game.. Warning - yet another Unity asset flip shovelware game. Aiming is completely off, for example when you stab with the knife it looks like the character is stabbing himself. Hilariously bad game.

How to win games with this guy:

Step 1: play on maps with buildings near VPs/fuel points

Step 2: Drop a forward HQ on said building

Step 3: Keep your guys near that HQ, reinforce your guys as needed.

Step 4: YOU MAY HAVE MEN, BUT I HAVE MORE MEN.

For real, this commander is really good if you catch them off guard. The ability to have an early game reinforcement point is really good for locking down important points, and that boosts your chance of winning a match by a large margin.

The forward HQ also have medics, so you can skip the medic upgrade. For the M45 AT gun, it's a cheap call in that is good for killing enemy LTs and scout cars, most importantly it's spammable.

This guy, as of this review, also have shock troops and KV-2. All of which are good anti-infantry measures as well.. Honestly i can't recommend this for anyone who has played the original game and any others like it (Age of Castles)

Where do i start....

You are force fed fights every corner, it is completely impossibility to win a few dozen before the game falls flat on its face and gives you god tiered enemies, meanwhile you just want to build up. I remember the old version when i was a kid, it was a lot better, i had a lot more fun. Now with this? I want a refund...

One thing that i hated right off the bat speaking of battles, was that you COULD in the old game, spam click the attack button to be done quicker, instead you slowly, slowly..... slowly..... kill your enemy

Upgrades are a joke, after 5 levels the low tier are relics, and by level 20 all 'powerups' are non existant. After you hit level 35 you just go to the beach and spam Go, it's that easy.

Random events are completely wiped, sure you still get them, but like 2% work. I found myself going "Oh, another storm... *Clicks Go*" when in the past i used to think "well this is about to be painful" because your nest would be taken down by a certain amount, and that would both hurt your defense for battles, and limit your food storage.

Grinding for population is probably the most irritating thing ever. As i said you spam Go constantly with the exception of a few battles. I remember it used to take me just under 5 mins to hit level 10 now? It took about 3 hours due to food shortage, only getting 1 per second (4-5 per day) and battles.

I can go on and on, but i'm not going to. If you want to play this, go ahead i'm not stopping you, but if you enjoyed the old game. Find something else... Avoid this like a plague. For it is boring, hair pulling inducing, insanity. I WILL be going for a refund, thank god i got this on deal because it was less of my money waisted.

Rating/Recommendation: Ruined Nostalgia. Jesus Christ, Denton. Fast-paced hardcore platformer, extremely fun! Vibrant colors and a killer soundtrack. 10/10. Terrible voice acting and awful writing. Tries to be funny but isn't. The gameplay itself is boring and repetitive. No thanks.
